Sizes: 4 inch = 3-4 inch pot 1 gal = 1 gallon pot 2 gal = 2 gallon pot

Availability: Nursery business can be unpredictable. In early February, nursery sources provided us with their best prediction whether a species would “likely” be available, “maybe” be available, has “limited” availability, or will be “unlikely” available at the time of our Sale. As usual, availability is subject to the whims of Nature, germination success of seeds, being sold out before our Sale, or only available in another pot size. The first column “Avail” indicates their prediction.

- Check your order and pay.

BARE ROOT SECTION

- **In addition to native plants, we offer a Bare Root Section** consisting of fruit-bearing trees, shade trees, and ornamental trees and shrubs. Most of these bareroot trees and shrubs are not true PNW “natives”, but they have been selected for their compatibility to thrive in our area but will not out-compete plants in our local native habitat.
- **These are not available as pre-order**, but only during sale days.
- We will not know which species will be available until the day before our Sale.
- No caneberries this year.

INFORMATIONAL TABLES

- Noxious Weed Specimens & Literature provided by WMSWCD.
- Resources, information, & handouts. Lists of native plants benefiting pollinating insects, bees, hummingbirds/birds, erosion control, sunny locations, shady locations, and fire resistant.
- Handouts of care of bareroot trees, proper planting techniques.
